“V-Go® changed my life immensely. It makes it so much easier to control my A1c.”

– V-Go user

Day 1: Start right

- Do not take any other insulin shots in combination with V-Go unless directed by your healthcare professional

- Wear V-Go any place where insulin can be injected and that remains flat when you sit, stand, or lie down

- Once V-Go is applied, make sure to press the Start Button until it locks to begin the flow of insulin

- Use the 2 Bolus Delivery Buttons to deliver the prescribed amount of insulin (1 click = 2 Units) at mealtime

- After a full 24 hours, replace V-Go with a new filled V-Go. If V-Go falls off, replace it with a new filled V-Go immediately

- If you have any questions, contact V-Go Customer Care (VCC)

Start on V-Go, stay on track

Learning something new can be challenging. We have the support you need to start and stay on V-Go successfully.

Get started on V-Go today and experience simplified insulin delivery you apply like a patch.

Visit www.startvgo.com for more information and support to get started on V-Go.
V-Go® is simple, all-in-one insulin delivery that fits your lifestyle

V-Go helps you because it delivers insulin much like your body is supposed to.* It helps you manage type 2 diabetes by delivering a steady rate of insulin 24 hours a day (basal).* V-Go also enables you to give yourself a dose of insulin at mealtimes (bolus).

With V-Go, you can help control your blood sugar with just 1 fast-acting insulin and 1 application daily.† This means eliminating the need for multiple daily injections to help improve blood sugar control throughout the day and night and at mealtimes.1-4

INSULIN DELIVERY WITH V-Go
1 fast-acting insulin,† 1 application daily

- Steady rate of insulin 24/7 (basal)
- On-demand dosing at mealtimes (bolus)
- On-demand dosing for snacks (bolus)

Choosing a V-Go application site
• Apply V-Go vertically to the back of your arm or thigh, or horizontally to your abdomen or back (avoiding folds of skin, muscle, or bone)
• Avoid areas with lots of hair or shave them
• Be sure you can easily operate V-Go before applying

Fill, Wear, Go
• Fill V-Go with fast-acting insulin†
• Apply it to the the back of your arm, abdomen, back, or thigh
• Push the top button to begin 24-hour insulin delivery
• Push the side buttons to administer mealtime insulin

Where to place your V-Go
- Back of the arm
- Abdomen or back, avoiding folds of skin, muscle, or bone
- Thigh

† If you follow the V-Go Instructions for Patient Use.
† A U-100 fast-acting insulin should be used with V-Go. Humalog® (insulin lispro [rDNA origin] injection) and NovoLog® (insulin aspart [rDNA origin] injection) have been tested by Valeritas, Inc. and found to be safe for use in the V-Go Wearable Insulin Delivery Device. Humalog® is a registered trademark of Eli Lilly and Company. NovoLog® is a registered trademark of Novo Nordisk A/S.

*Valeritas does not give medical advice about insulin therapy. Discuss all medical therapies with your healthcare professional.
Important Risk Information: If regular adjustments or modifications to the basal rate of insulin are required in a 24-hour period, or if the amount of insulin used at meals requires adjustments of less than 2-Unit increments, use of the V-Go Wearable Insulin Delivery Device may result in hypoglycemia. The following conditions may occur during insulin therapy with V-Go: hypoglycemia (low blood glucose) or hyperglycemia (high blood glucose). Other adverse reactions associated with V-Go use include skin irritation from the adhesive pad or infections at the infusion site. V-Go should be removed before any magnetic resonance imaging (MRI) testing.

If you ever have questions, be sure to call V-Go Customer Care at 1-866-881-1209
