Do you have type 2 diabetes and take multiple insulin shots each day?

Rediscover a life without pens, syringes, or pumps

Ask your diabetes health care professional today about switching your insulin delivery to V-Go®.

Go-VGo.com

Patients prefer V-Go®:

“With V-Go I can go anywhere and do anything and be confident that I am getting my insulin steadily all day long. I like that with V-Go, I really don’t have to think about anything.”

—Debra, Age 59

Make multiple daily insulin shots a thing of the past.

24
All-day-and-night blood sugar control

☑
Apply like a patch once a day

💧
Only fast-acting insulin needed

$*
Reimbursed by Medicare Part D and most Commercial Insurance

Simplify with V-Go®
Insulin delivery that’s worn like a patch

Lower A1C while using less insulin as compared to multiple daily injections¹,²
- No need to carry insulin pens, syringes, or vials

So discreet, nobody will know you’re using it—even at mealtimes
- Mealtime insulin can be administered with a few simple clicks, over clothing³
- No batteries, tubes, or programming

V-Go is reimbursed by Medicare Part D and most Commercial Insurance
- Only 1 type of insulin used—no need for long-acting insulin
- No co-pay for needles or syringes

Reimbursement is simplified
- V-Go Customer Care (1-866-881-1209) can contact your insurance provider and help you with reimbursement solutions

V-Go Cost Savings Card

Important Risk Information
If regular adjustments or modifications to the basal rate of insulin are required in a 24-hour period, or if the amount of insulin used at meals requires adjustments of less than 2-Unit increments, use of the V-Go Disposable Insulin Delivery Device may result in hypoglycemia. The following conditions may occur during insulin therapy with V-Go: hypoglycemia (low blood glucose) or hyperglycemia (high blood glucose). Other adverse reactions associated with V-Go use include skin irritation from the adhesive pad or infections at the infusion site. V-Go should be removed before any magnetic resonance imaging (MRI) testing.

“Wearing V-Go is like wearing a watch. I really don’t know that it’s there until I need to reach for it.”
—Jim, Age 56
