

# Make multiple daily insulin shots a thing of the past.

All-day-and-night blood sugar control

Apply like a patch once a day

Only fast-acting insulin needed

Reimbursed by Medicare Part D and most Commercial Insurance

## Patients prefer V-Go®.<sup>4</sup>

*"With V-Go I can go anywhere and do anything and be confident that I am getting my insulin steadily all day long. I like that with V-Go, I really don't have to think about anything."*

—Debra, Age 59

# Simplify with V-Go<sup>®</sup> Insulin delivery that's worn like a patch

**Lower A1C while using less insulin as compared to multiple daily injections<sup>1,2</sup>**

- No need to carry insulin pens, syringes, or vials

**So discreet, nobody will know you're using it—even at mealtimes**

- Mealtime insulin can be administered with a few simple clicks, over clothing<sup>3</sup>
- No batteries, tubes, or programming

*"Wearing V-Go is like wearing a watch. I really don't know that it's there until I need to reach for it."*

—Jim, Age 56

## Important Risk Information

If regular adjustments or modifications to the basal rate of insulin are required in a 24-hour period, or if the amount of insulin used at meals requires adjustments of less than 2-Unit increments, use of the V-Go Disposable Insulin Delivery Device may result in hypoglycemia. The following conditions may occur during insulin therapy with V-Go: hypoglycemia (low blood glucose)

**V-Go is reimbursed by Medicare Part D and most Commercial Insurance**

- Only 1 type of insulin used—no need for long-acting insulin
- No co-pay for needles or syringes

**Reimbursement is simplified**

- V-Go Customer Care (1-866-881-1209) can contact your insurance provider and help you with reimbursement solutions

**V-Go Cost Savings Card**
