### Device Update

<p><b>Original device design</b></p> 	<p><b>New device design</b></p>  <p><b>Raised bumps</b></p> <p><b>Small notches at the base and top</b></p>
--	---

### Packaging Update

<p><b>Original V-Go 20 packaging</b></p> 	<p><b>New V-Go 20 packaging</b></p> 	<p><b>Preset basal rate:</b> 20 Units/24 hr (0.83 U/hr)</p> <p><b>On-demand bolus dosing:</b> Up to 36 Units in 2-Unit increments</p> <p><b>NDC # 08560-9400-03</b></p>
--	--	---

<p><b>Original V-Go 30 packaging</b></p> 	<p><b>New V-Go 30 packaging</b></p> 	<p><b>Preset basal rate:</b> 30 Units/24 hr (1.25 U/hr)</p> <p><b>On-demand bolus dosing:</b> Up to 36 Units in 2-Unit increments</p> <p><b>NDC # 08560-9400-02</b></p>
--	--	---

<p><b>Original V-Go 40 packaging</b></p> 	<p><b>New V-Go 40 packaging</b></p> 	<p><b>Preset basal rate:</b> 40 Units/24 hr (1.67 U/hr)</p> <p><b>On-demand bolus dosing:</b> Up to 36 Units in 2-Unit increments</p> <p><b>NDC # 08560-9400-01</b></p>
--	--	---

Dispense each as one (1) kit. Do not break apart. Each kit contains 30 single-use V-Go devices and one EZ Fill filling accessory.

## Processing Copay Card:

Valid for Commercially Insured (OCC-8) and Insured Not Covered (OCC-3) Patients ONLY.

1. Process as a split bill (Coordination of Benefits claim/COB).
2. Use patient's Insurance for PRIMARY claim. If not covered, bypass rejection to process secondary claim.
3. Use copay card for SECONDARY claim using BIN: 610020.

For copay card processing questions call 1-855-236-2128.

## Insulin Dispensing Requirement *per FDA Labeling:*

**V-Go 20:** 2x10ml per 30-day supply

**V-Go 30:** 3x10ml per 30-day supply

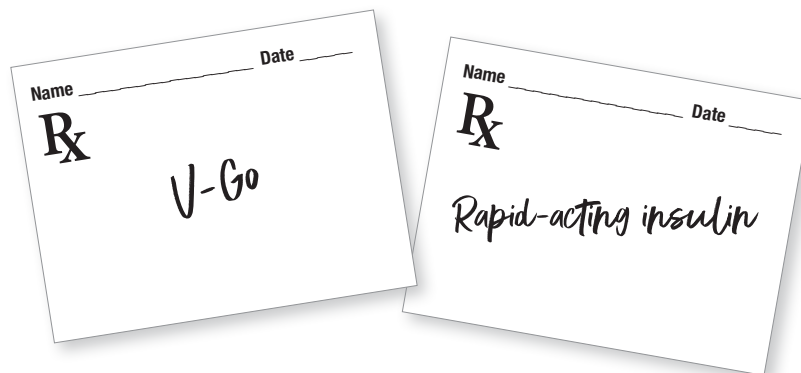

**V-Go 40:** 3x10ml per 30-day supply

## Confirm Your Patient Received *Two* Prescriptions:

V-Go device Rx **&** Rapid-acting insulin Rx

### Important Risk Information

If regular adjustments or modifications to the basal rate of insulin are required in a 24-hour period, or if the amount of insulin used at meals requires adjustments of less than 2-Unit increments, use of V-Go Disposable Insulin Delivery Device may result in hypoglycemia. The following conditions may occur during insulin therapy with V-Go: hypoglycemia (low blood glucose) or hyperglycemia (high blood glucose). Other adverse reactions associated with V-Go use include skin irritation from the adhesive pad or infections at the infusion site. V-Go should be removed before any magnetic resonance imaging (MRI) testing.
